

## NEW AUDITION PLATFORM

# OPUS EVENT

*Opus Event is a fully online program designed to streamline our audition process. This platform simplifies every step, from registration to payment, making the entire experience more efficient and user-friendly for everyone involved. This new audition process will also be more aligned with the middle school and high school process.*

### **Flexible Registration Options**

Teachers can register students all at one time, saving time for the teacher. If registering more than 5 students, verification of enrollment will be required.

### **Convenient Audition Links**

Opus Event allows teachers to send out audition links directly to parents. Or if conducting auditions in class, the teacher can open and submit the audition for the student.

### **Enhanced Teacher Control**

Teachers have full control over the registration and audition process. This allows the teacher to be as hands on, or off as they choose. Auditions will be audio only using this platform. No need to worry about students being in the background, or covering identifiable information.

### **Simplified Payments**

With Opus Event, parents can easily pay for auditions through the online platform. This eliminates the need for teachers to collect and handle money for the audition process. Parents will need a debit or credit card to pay through a secure link.

### **Audition Choice**

Whether you prefer to audition students in person during class or let them audition from home, Opus Event accommodates both options. This flexibility ensures that all students have a fair audition experience.
